theraCUES™
SIGNALS FOR LIFE

Next-Generation Sequencing (NGS) Services

Empowering Precision Medicine with End to End Genomics Services

Our Comprehensive NGS Portfolio

- **RNA Sequencing(RNA-Seq)**
  Transcriptome profiling, gene expression, alternative splicing. mRNA/Total RNA
- **Small RNA Sequencing**
  For profiling miRNAs and other small non-coding RNAs
- **Metagenomics**
  Targeted 16S/ 18S/ ITS and Shotgun Sequencing
- **Whole Genome Sequencing(WGS)**
  Variant analysis across entire genome
- **Microbial WGS**
  Bacterial, viral, fungal genome assembly and annotation
- **Whole Exome Sequencing(WES)**
  Focused on protein-coding region
- **Targeted Gene Panels (Amplicon Sequencing)**
  Custom panels for specific disease pathways or biomarker discovery

Workflow & Capabilities

- Sample Collection & QC
- Nucleic Acid Extraction (DNA/RNA)
- Library Preparation
- Sequencing (Illumina Platforms)
- Bio-informatics Analysis
- Data Delivery & Reporting

Deliverables

- Raw FASTQ files
- Aligned BAM files
- Variant Calling(VCF)
- Gene Expression Matrices
- Custom Analysis Reports
